Delivery Day Log

Keep this on the counter with a pen — sixty seconds per meal, zero memory required

One line per delivery. This is the log that answers "who do we even thank?" later, and doubles as your food-safety date book.

Date	From (name + phone)	What they brought	Allergen flags attached?	Cooler drop?	Eat now / freeze?	Thank-you sent

Freezer & fridge inventory

Date everything as it goes in, and "serve by" is three months for most cooked meals, one month for anything creamy.

Item in freezer / fridge	Date in	Serve by	Notes

> Food safety in one line: cold food cold (40 °F or below), hot food hot, don't leave perishables on a warm porch for hours, and when in doubt, toss it. A kind meal that makes someone sick is not a kind meal.

> Put the *thank-you sent* column last on purpose: a two-line text written the same night beats a perfect note scheduled for a rainy day.
